# ABOUT VKC

VKC Founded in 2008 by M/s. VINOD KAMBLE. VKC delivers world-class engineering & construction services.

VKC is one of the leading construction companies having expertise in construction of rigid and flexible pavements for roads with reinforced earth and earthwork.

VKC specialize in undertaking major industrial, residential and commercial projects. We deliver integrated Engineering, Procurement and Construction services for civil construction and infrastructure sector projects.

Along with our clients, we deliver projects that create long-term development and economic growth for our country.

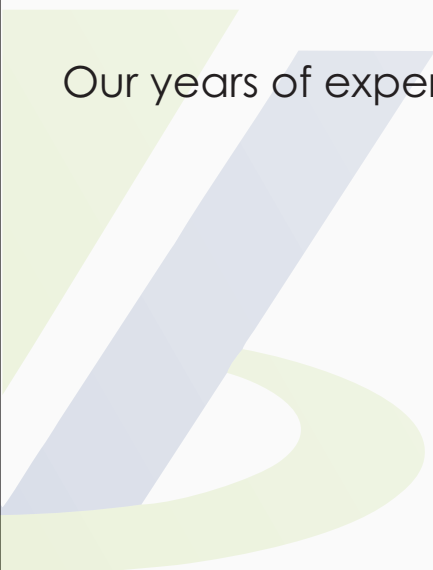

# WHY VKC ?

Road construction is not just building a road. It is the preparation of a complete environment for building and living, above as well as underground. Without a proper foundation you cannot build a solid road. The type of foundation depends on the soil type.

That is why VKC has geotechnical experts. we can examine the soil type and together with our technical and quality department we will propose a type of foundation suitable for the project.

The asphalt truly tops things off. Our Team will bring the finishing touch to the road.

Our years of experience will guarantee you a job according to your wishes
